A Maniac's Experience.

I was once insane, and I often muse over my experience. There are of course many kinds of insanity. Some mental disorders take place so gradually that even the close t companions of the vitim are at a loss to remember when the trouble te at. It must have been thi way in my case. One evening, after ar expressively warm day, a day when I experienced more fatigue from the heat than ever before or since, I sat on my porch fanning myself. "This arm that is now in motion," I mused, "must one of these days be dust. I wonder how long will the time be."

Then I mused upon the evidence and of immortality, I could do things that other tople could not accomplish I had gone through battle after battle and thou, it builets sang and struck around me as thick as hail, yet I remained uninjured I had passed through epidemics of yellow fever. My idea gained strength as I mused, and I was convinced that I should live forever. No, this cannot be, for death follows all men alike. Yes, I am to die like other men, and I believe it is my duty to make the most of life, to make money and enjoy myself, and to educate my children. I wanted to be rich, and be- through to completion, while a one gan to study over an imaginary list of enterprises.
